

# Flemington Road Intersection Upgrade

**Projected Project completion date:**  
December 2010

**Overall value of project:** \$4.4m

**Location:** Mitchell, ACT

**Client:** ACT Procurement Solutions

**Contract type:** Lump Sum

**Scope:** The project consisted of the upgraded priority bus route and reconstruction and signalisation of the Flemington Road and Sandford Street Intersection. The works consisted of:

- Construction of deep lift asphaltic concrete pavement
- Resurfacing of existing pavement
- Relocation of Watermain
- Construction of Sewermain and associated structures
- Construction of Stormwater and associated structures
- Construction of traffic signals and associated conduit and services
- Relocation of existing power and communication services
- Upgrades to street lighting
- New landscaping
- Installation of traffic control devices

Young, 02 6112 4500

The works were carried out in a high traffic region with a number of existing services and fauna to be protected. Therefore environmental control, temporary traffic management and safety management were all key elements of the project along side quality assurance.

**Referee:** Tom Layton, Cardno
