

COMPANY POLICY

Huon

At Huon we have a highly experienced and highly motivated team. Collectively we have an extensive history of working in the ACT and surrounding region. We have built a reputation for excellence in all aspects of our business. We look to continue to build on that reputation into the future.

We want to exceed the expectations of our clients

and the community at large by constructing and managing our projects on time, on budget and to the appropriate level of quality. The Company also seeks to meet regulatory standards and legitimate community expectations, including for safety and environmental matters.

We want to exceed the expectations of our staff

by providing safe, healthy workplaces, by training, informing and offering challenges on a variety of projects to enhance the depth of experience and skills of each staff member and by making their work day an enjoyable experience.

We want to exceed the expectations of our partners

such as subcontractors, suppliers and consultants by demanding and rewarding their commitment to our team effort. We will honour our partnership obligations and seek to maximise our partners' benefit as we do our own.

To achieve this, Huon is committed to implementing a Management System based on AS/NZS ISO9001:2008, setting objectives and measuring and improving performance. The management system also addresses safety and environmental matters. The Company's Management System is documented in its Operations Manual.
